SIRIUS CONTROLLER PERFORMANCE UP FOR MAJOR CUSTOMER

Gas appliance supplier and installer, SIRIUS, has reported that its LPG performance on residential central heating systems has improved. The company, which has approximately 15,000 systems on the market, has seen an increase in the number of customers reporting how well their heating systems are performing.

The company recently updated its SIRIUS controller, which is responsible for controlling the temperature of the heating system. The updated controller is more efficient and can better handle the demands of modern heating systems.

SIRIUS controller improvements are expected to result in lower gas consumption and reduced energy bills for customers.

For more information on the SIRIUS controller, please contact SIRIUS directly.

WEB DESIGN CONFERENCE FORUM PLANNING UPDATE

The planning for the 2012 New Zealand Gas Association Web Design Conference is in full swing. The conference will take place on 1st November at the Crowne Plaza Hotel in Christchurch.

The conference will feature a range of speakers from the web design industry, including experts in design, usability, and content management.

For more information on the conference, visit the website.

GOLD WEATHER EN CORES GAS BILLS

The recent cold snap has created a surge in demand for heating. The company supplying heating services, Gascoyne, has seen a significant increase in the number of calls for heating services.

The company has advised customers to ensure their heating systems are functioning correctly and to contact them if they encounter any issues.

For more information on heating services, visit the Gascoyne website.
