

DECEMBER 2019 EDITION

Published monthly by LPG and Gas Associations of New Zealand

Gasline is published regularly as part of the industry's efforts to encourage the direct use of natural gas and LPG into households and small businesses.

Using natural gas and LPG as a direct energy source offers numerous cost, environmental and energy efficiency benefits. Gas New Zealand hopes to educate consumers and policy makers about the many advantages of making wider use of this strategic energy asset.

GasNZ Forum: 'Engage more actively with the public'

Natural gas global demand continues to grow, IEA says

Global demand for natural gas as a lower carbon energy source will continue to grow in coming decades, according to the International Energy Agency (IEA)'s World Energy Outlook 2019.

However, the energy world is marked by a series of deep disparities, [the latest report states in its executive summary](#).

Support for natural gas' role in Australian clean energy transition

More than 100 business leaders and industry decisionmakers came together in Brisbane to participate in the Evolving the conversation: Australia's energy future event.

Looking at the growth of renewable energy in Australia, attendees including Energy Security Board Chair Dr Kerry Schott voiced their support for the role natural gas will play as Australia transitions to a clean energy future.

Following the last Gasline's collection of [GasNZ Forum](#) presentations, we continue showcasing speakers who tried answering the sector's biggest questions about its future.

[Read more](#)

Dr Kerry Schott was joined by Minister for Natural Resources, Mines and Energy, Dr Anthony Lynham, to lead a discussion on how to ensure the sustainable growth of renewable energy and the role industry must play in helping to shape national energy policy.
