Welcome to Gasoline, which is produced by Can New Zealand

Gasoline, a crucial component, has a significant impact on the industry’s profitability. It is the fuel of choice for many businesses, especially small businesses. Using natural gas and LNG as an effective alternative to diesel is one step towards reducing the impact on the environment.

In this issue:

Gas Industry and Politics

The USA Executive Director, Peter Gilbert, and the former Federal Reserve Governor, Thomas, have recently filed a climate change lawsuit against Shell Oil. This lawsuit has raised awareness about the importance of climate change and the need for action.

Following the lawsuit, Peter Gilbert and the former Governor, Thomas, have taken action to combat climate change and promote sustainability. They have advocated for the use of natural gas and other clean energy sources.

NZ Gas Tariffs Summit in Auckland

A free two-day NZ Gas Tariffs Summit was held on September 15 and 16 in Auckland. The summit focused on the future of gas in New Zealand, including discussions on gas tariffs and their impact on the industry.

One of the key topics discussed was the introduction of new gas tariffs for the industrial sector. The summit also featured presentations on the latest developments in the gas industry and the impact of climate change on the industry.

CNG Bus to Auckland

The first dedicated CNG bus route in Auckland has been introduced to support urban transport initiatives.

The route, which operates on 15 routes per day, is expected to reduce emissions and promote sustainable transport options.

The NZ Bus has been chosen for the trial because it is more efficient and can be operated on existing infrastructure, reducing the cost of investment.

The NZ Bus is expected to be in service by 2020.

We are always looking for ideas for Gasoline please send them in at info@can.co.nz.
