

Welcome to the
Gasline Newsletter

SEPTEMBER 2019 EDITION

Published monthly by LPG and
Gas Associations of New Zealand

Gasline is published regularly as part of the industry's efforts to encourage the direct use of natural gas and LPG into households and small businesses.

Using natural gas and LPG as a direct energy source offers numerous cost, environmental and energy efficiency benefits. Gas New Zealand hopes to educate consumers and policy makers about the many advantages of making wider use of this strategic energy asset.

GasNZ Forum: investigating the energy sector's biggest questions

In this Gasline issue, another [GasNZ Forum](#) speaker will enlighten readers with an extract of their upcoming presentation and the challenges the sector faces.

Last month, Gasline highlighted two GasNZ Forum speakers' presentations – Matt Burgess and Barbara Jinks. But for a different perspective, Albert de Geest is reminding attendees to have their phones at the ready, and their views.

ExxonMobil partners up for new carbon capture tech

One of the world's largest international oil and gas companies has progressed research on a process to separate carbon from air or flue gas.

[Read more](#)

Australian industry considers reducing the emissions from gas

Gas is considered the cleaner of the fossil fuel as, unlike its heavier cousins oil and coal, it does not produce particulates when burned to provide energy.

Cooking with Gas: 2018 update

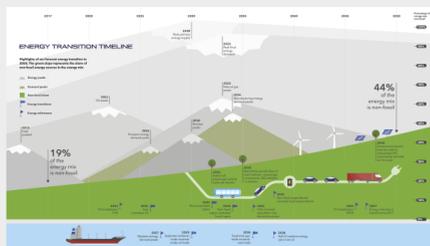

Empowering women and improving their status are essential to realising the full potential of economic, political and social development.

That's the vision of the WLPGA Cooking For Life programme, with the goal of transitioning 1 billion people from cooking on traditional fuels and other dirty and dangerous fuels such as kerosene to LPG by 2030.

And its recent report – Cooking with Gas – was updated in January to look into the adoption of LPG globally.

Gas, renewables and CCS 'must drive decarbonisation by 2050'

Gas, renewables and carbon capture and storage (CCS) must be used together to rapidly transition to a clean energy system.

So says DNV GL Oil and Gas, a technical advisor to the oil and gas industry.
