

FEBRUARY 2020 EDITION

Published monthly by LPG and Gas Associations of New Zealand

Gasline is published regularly as part of the industry's efforts to encourage the direct use of natural gas and LPG into households and small businesses.

Using natural gas and LPG as a direct energy source offers numerous cost, environmental and energy efficiency benefits. Gas New Zealand hopes to educate consumers and policy makers about the many advantages of making wider use of this strategic energy asset.

The importance of hydrogen and fuel cell technologies

The European Union, America and Japan have issued a joint statement on hydrogen and fuel cell technology, announcing a new cooperative between these organisations.

Updates for two important LPG Codes of Practice

LPG Association Code of Practice
LPGA COP No 2

Installation and maintenance of twin
45 kg LPG cylinder systems

LPGA COP No 5

Installation and maintenance of LPG
multi-cylinder systems

Two very important Codes of Practice have been updated to reflect changes to the regulatory regime, and to reinstate the relevant clause and drawings from industry Standards.

Relating to the installation and maintenance of twin 45kg LPG cylinder systems and multi-cylinder systems, these updates provide an easy to use, one stop shop for users of the Codes, including gas fitters, architects and designers.

New LPGA President confident of future

Leading the LPG Association in his first tenure as its new President – and possibly during its most critical juncture – is Cameron Jardine.

General Manager of Genesis' LPG Operations, Cameron has had a varied career in service brands from Westpac to Vodafone.

So, he believes picking up where now former President Graham Hardie left off will benefit from his marketing and communications background.
