

NOVEMBER 2020 EDITION

Published monthly by LPG and Gas Associations of New Zealand

Gasline is published regularly as part of the industry's efforts to encourage the direct use of natural gas and LPG into households and small businesses.

Using natural gas and LPG as a direct energy source offers numerous cost, environmental and energy efficiency benefits. Gas New Zealand hopes to educate consumers and policy makers about the many advantages of making wider use of this strategic energy asset.

Keeping options open will help get New Zealand to net zero

Allowing Kiwi building owners to make more informed choices about their energy use will help contribute towards New Zealand's shift to a net zero carbon economy.

Cementing her place within Liquigas, confidence in life

Thirteen years under Renee Williams' belt at New Plymouth-based Liquigas, followed by a restructure and then COVID-19, completing the Women & Leadership New Zealand's Executive Ready leadership development program couldn't have been better timed.

First dual-fuel LPG conversion completed for Very Large Gas Carrier

The first conversion of a Very Large Gas Carrier (VLGC) to Liquefied Petroleum Gas (LPG) dual-fuel propulsion has been completed with the ship, the BW Gemini, starting weeklong sea and gas trials.

Firstgas and Hiringa Energy have sights set on advancing green hydrogen, together

Firstgas and Hiringa Energy have their sights set on the development of a green hydrogen economy and this month announced a collaboration agreement that will support New Zealand's objectives to further advance this.

"Both Firstgas Group and Hiringa Energy are committed to helping New Zealand move towards net zero emissions by 2050, by harnessing the power of green hydrogen and this partnership is a positive step in the right direction," Paul Goodeve, CEO Firstgas Group said.

Federal Government emissions reduction policy

For more than ten years, climate change action in Australia has fallen victim to bitter political division and claimed the political scalps of a succession of leaders including Kevin Rudd, Julia Gillard, Tony Abbott and Malcolm Turnbull.

The impacts of this political divide are that the Australian Parliament has been unable to implement a coherent energy policy at a time when, arguably, one is needed more than at any other time in the country's history.

In October, Australian Prime Minister, Scott Morrison, began planning a pragmatic approach to respond to the challenges of implementing a policy on climate change.
