

APRIL 2021 EDITION

Published monthly by LPG and Gas Associations of New Zealand

Gasline is published regularly as part of the industry's efforts to encourage the direct use of natural gas and LPG into households and small businesses.

Using natural gas and LPG as a direct energy source offers numerous cost, environmental and energy efficiency benefits. Gas New Zealand hopes to educate consumers and policy makers about the many advantages of making wider use of this strategic energy asset.

Case study: From grey to blue

A lower-carbon footprint vision – that has so far captured and stored more than 5 million tonnes (mt) of CO₂ – is being realised in the C\$1.35bn Quest Carbon Capture and Storage (CCS) project.

Gas shortage risks climate goals – Fonterra

Dairy giant Fonterra says the Climate Change Commission's "ambitious" goal to end industrial coal use by 2037 is at risk without greater certainty on longer-term gas supplies.

New generating engines form the heart of a gas power plant

Relatively quick-start engines will supplement renewable energy and help prevent blackouts through provision of stability services, says gas engine manufacturer Innio Jenbacher.

Businesses stand ready to work with government on climate challenge

Businesses will play an important role in supporting New Zealand's transition to a net zero emissions future and the development of a long-term whole-of-energy strategy, says BusinessNZ.

That was the main point of the organisation's submission to the Climate Change Commission's (CCC) draft advice to Government.

Marsden Point oil refinery could become green energy hub in bid to future-proof

With a possible move to producing biodiesel and hydrogen, as well as using electricity from a solar farm and large battery banks, New Zealand's only oil refinery is looking to modernise.

Refining NZ, which operates the refinery at Northland's Marsden Point, has been granted a 35-year resource consent to keep operating both its refinery and import terminal operations.
