

# GASLINE

## AUGUST 2021 EDITION

### Welcome to the Gasline Newsletter

Published monthly by LPG and Gas Associations of New Zealand

Gasline is published regularly as part of the industry's efforts to encourage the direct use of natural gas and LPG into households and small businesses.

Using natural gas and LPG as a direct energy source offers numerous cost, environmental and energy efficiency benefits. Gas New Zealand hopes to educate consumers and policy makers about the many advantages of making wider use of this strategic energy asset.

### Expanding LPG technology as a clean fuel alternative

Two licensing agreements will help decarbonise energy systems and supplying green LPG for both the developing and developed worlds.

Research company, GTI, has recently entered into licensing agreements with the Global LPG Partnership (GLPGP) and BioLPG, LLC (BioLPG), for its Cool LPG technology.

### CarbonFree has developed a means of mineralising emissions

As reported by [Natural Gas News](#)

US engineering group Fluor has partnered with carbon capture utilisation and storage developer CarbonFree to help bring the latter's technology to market.

CarbonFree's patented SkyCycle technology captures CO2 that would otherwise be emitted by industrial plants and mineralises those emissions.
